Singapore Primary Mathematics Home Schooling Programme  
Package for International, Local and Returning Students.

THIS MATHS PROGRAMME IS PERFECT FOR YOUR CHILD IF

- YOU ARE NOT RESIDING IN SINGAPORE BUT INTENDS TO SEND YOUR CHILD TO SINGAPORE PRIMARY SCHOOLS,
- YOU ARE SINGAPOREAN AND HOMESCHOOL YOUR CHILD,
- YOU ARE SINGAPOREAN ABROAD WITH CHILDREN WHO WILL BE RETURNING STUDENTS TO A SINGAPORE PRIMARY SCHOOL.

**The Mom & I Everyday Maths** programme is based on Singapore mathematics syllabus for primary schools. Primary school caters to school age-going children of between 7 to 12 years old. One of the key features of Singapore syllabus is that it is easy to follow and understand. Concepts are explained in greater depth through the use of pictorial forms before proceeding to symbols and applications of these symbols. At Interactive Minds, we have developed the Singapore Primary Mathematics Home Schooling Programme Package called **Mom & I Everyday Maths**, just for this purpose. Under this programme, your child is introduced to the topics that would be learnt by their peers in Singapore. The programme is systematically designed in accordance with the Singapore syllabus. This means that when the child eventual starts school in Singapore, his knowledge of mathematics would be on par with his Singaporean classmates.

At **Mom & I Everyday Maths**, we encourage parents to become an active partner in the child's learning process. Hence this programme offers an opportunity for one of the parents to become an active participant in the child's cognitive development, which is playing a role as maths mentor and coach to your child. The programme consists of the following features:

1. Lesson Guide For Parents
2. Daily Worksheets (Mondays to Fridays) – 15 to 20 mins
3. Self assessment of Child's progress
4. Biannual 'Exams' (for Terms 2 and 4)
5. Outing Cards
6. Online Support

If your child is already enrolled in a school in your home country or host country, this programme could be used as a supplementary text to his lessons. Hence, the daily weekday worksheets are designed such that it would take the child only about 15 to 20 minutes each day to work on the sums and problems solving, so as not to overload him/her. As Singapore advances its primary school mathematics syllabus, you can be assured that your child will be getting one of the best primary school mathematics education and latest mathematics text through Mom & I Everyday Maths. As we say at **Mom & I Everyday Maths**, when numbers bond, everybody scores.
