Lesson Plans	✓	✓
Collaborative Games	✓	✓
Heuristic Worksheets	✓	✓
Online Support	✓	✓

The Mom & I Everyday Maths programme is based on Singapore mathematics syllabus for primary schools. Primary school caters to school age-going children of between 7 to 12 years old. One of the key features of Singapore syllabus is that it is easy to follow and understand. Concepts are explained in greater depth through the use of pictorial forms before proceeding to symbols and applications of these symbols.

With **Mom & I Everyday Maths** programme, parents are encouraged to become active partners in the child's learning process. In fact this programme offers an opportunity for at least one of the parents to become a "hands-on" mom or dad. It is a fact that children whose fathers or mothers regularly help and mentor them with their studies tend and are more likely so to do well in school examinations.

Indeed as a supplementary maths text, the worksheets have been designed to help a child progresses gradually so that he/she can acquire the required maths skill sets over a comfortable period of time. Students are encouraged to spend about 15 to 20 minutes each day to work on the sums and problems solving to get maximum benefit. As Singapore advances its primary school mathematics syllabus, you can be assured that your child will be getting one of the best primary school mathematics education and latest mathematics text through Mom & I Everyday Maths. As we say at **Mom & I Everyday Maths**, when numbers bond, everybody scores.
